SPECIFICATIONS SUBJECT TO CHANGE WITHOUT NOTICE

The T-650 is quite simply the most technologically advanced tabber on the planet. It can do something no other tabletop tabber on the market can do: apply tabs to opposite sides of a mailpiece or the top & side of a mailpiece *simultaneously*.

Booklet tabbing has become a difficult and costly task with today's USPS rules. Mailers are scrambling to find a solution that will restore productivity to their tabbing operation. RENA has the solution in the T-650 Multi-Side Tabber, an engineering marvel. One fixed tab head applies tabs along an open edge, while the other repositionable head can switch from side tabbing to front (or leading-edge) tabbing. This flexible head can also affix USPS stamps, flat tabs or even small labels.

The amazing T-650 multi-side tabber is a purpose-built unit that will make your jobs easier, more productive and more profitable for a quick return on your investment. Heavy duty aluminum and steel construction ensures years of reliable high performance use.

Its inline design will interface with our inline Envelope Imager XT printers as well for true Tab 'N Print productivity. The talented T-650 Multi-Side Tabber/ Stamp Affixer is a real multi-tasker - one machine that can do it all!
